Transfer case	2-speed mechanical with interaxle locking differential
Hub reduction gear	one-speed with cylindrical gears
Driving axles	with cross-axle differential spring,
Suspension	from Ural-53099 vehicle
Maximum speed, km/h	not less 100
Fuel endurance, km	1,000
Overall dimensions, length / width / height, mm	6,500 / 2,550 / 2,800
Road clearance, mm	400

The "VPK - Ural" Armoured Multipurpose Vehicle with a 4x4 wheel arrangement is designed to transport personnel or military stores with the required level of protection, installation of weapons systems and special equipment, as well as for towing trailed systems. A characteristic feature of this vehicle is that it was created on the two-axle 4x4 chassis of the Ural-53099 vehicle, using waste and mass-produced components and assemblies of army multi-purpose vehicles of the Ural brand. This significantly reduces the overall cost of the product and increases its operational reliability and reduces operating costs.
